

EDM: New England's Top EDM Venue

I've been around the world and experienced a lot of clubs and types of nightlife, and I must say we have an amazing nightlife and beautiful people in our own little state.

With more than a decade of experience in EDM mayhem, RI holds one of the most legendary EDM clubs in New England: Club Therapy. Even New York promoters take interest in it. With its heavy scheduling of major worldwide headliners, Club Therapy is not about to slow down.

After the unscheduled closing of its lone afterhours club in Nov 2011, Providence was left with a void. It would be more than 2 years before something would return to fill the 2 - 6am gap that was lacking in Providence's nightlife. Boasting "New Venue, Same Vibe," Therapy has returned to Dike St, moving to a newer, cleaner space a couple blocks down at number 62. The club contains an earth-shaking system with 12 subs and eight line array speakers, all custom built. The main room has four large projection screens — two behind the DJ and two on either side of the dance floor. A custom-designed light show and truss layout tie the room together and pull you into the music. The front room lounge uses two subs and two tops from the Martin Audio system that was in the main room at the former location, and there's a unique 3D mapped visual display as a backdrop for the DJ. Saturdays midnight - 6am; Underground house and techno with international guests

Fridays midnight - 6am; Various scheduled events with a wide variety of acts 18+, No liquor
