**Aries:** A delay involving money, signing papers, debts owed by you and/or to you creates a glitch in your plans. Don't sign until you are clear about it all. Friends are active in your life now, and you engage in some very deep and probing conversations with them. You're at a point in a relationship where you need to decide to halt or move forward.

**Taurus:** You are the ultimate people person during this period. While you may have some difficulty with authority figures, most of your other relationships run smoothly. Some great social activities, as well as interesting conversations, keep things lively. You make the effort to move your career forward. Do it, the energy is right.

**Gemini:** The pace of life picks up for you. Keep track of engagements, appointments and social events as there is a strong possibility of overbooking. There is a hitch or glitch in some kind of reorganization plan. Not to worry, it will work itself out. In the meantime, have the conversation and say the things that need to be said.

**Cancer:** A love affair or creative project stalls. This is a good time to review what has been going on. If you begin a love affair or business deal during this period, things will look very different a month from now. Proceed with caution. Take baby steps and look before you leap. Be wary of anyone who may try to control you.

**Leo:** Things are rocking in your world, and some of it hits very close to home while some impacts your work and professional life. Some decorating or rearranging you want to do may have to be put on hold. This could be due to lack of funds or inability to make up your mind. Your workload increases.

**Virgo:** Activity in your everyday life increases. You run here and there and touch base with a lot of people, conjuring up a lot of new ideas. You are able to focus and harness some energy, bringing forth some creativity that expresses your true self. Dive right in to all of this because it will expand your consciousness and widen your world.

**Libra:** Change is in the air on a number of levels. How you express yourself, where you live, what you think and what is important to you are just a few of the possibilities. Whatever, you can be sure that you will be doing what you want to do, not what someone else expects of or from you.

**Scorpio:** Conversation runs the gamut from the serious and profound to the light and frivolous. One thing is for sure: You will be having a lot of them. Folks are attracted to you now, so take advantage of it. Someone unusual or not your usual type of friend or lover enters the picture. A lot of fun, but not too stable.

**Sagittarius:** On the surface you seem very outgoing and sociable during this period, but in reality, a lot is going on beneath the surface. Secrets are revealed, even some about yourself, like actions you take subconsciously that affect how people perceive you. Might want to take a look at that.

**Capricorn:** With the help of friends, new and old, you contemplate taking a new direction in your life. You will, of course, give this some serious thought before you make any major moves. You realize that you are not the person you were a few years ago and changes need to be made. Think it through;

there's no rush.

**Aquarius:** Everything you do is out there and up front these days. You can't help but get noticed, and that is no problem for you. You're pumped and ready for action. In fact, this is a good time to start an exercise program or get more active in some way. Unexpected changes impact your public and private life.

**Pisces:** It is very easy for you to shoot yourself in the foot during this period. Be careful what you do and what you say. Your actions may not be received in the way that you intended. You're filled with new ideas and new insights and want to share them. Your enthusiasm may backfire. Slow down, think, then speak and do.
