

Snow Wed Changing to Rain Wed Night: High winds, a fraction of an inch before being washed away by heavy rain

At Providence, snow beginning Wed 3pm - 5pm will change to rain 5 - 8pm, but less than 1 inch is expected before being washed away by heavy rain with temperatures rising to 50F before ending Thu 6 - 8am. Wind gusts to 40MPH are likely for several hours during the peak of the storm.

A **Winter Weather Advisory** is in effect Wed 1pm to Thu 1am covering most of northern RI as well as central and western MA and inland CT. Travel may be difficult especially during the Wed evening commute, and the combination of heavy rain and gusty wind may take down tree limbs and power lines.

Probability of accumulation at least 0.1in is 94% and 1in is near 0%.
